- SQLite3

EDUCATION

Flatiron School

Software Engineering
Bootcamp Program
Completed July 2020

University of Virginia

B.A. Cognitive Science
Charlottesville, VA
May 2018

TECHNICAL PROJECTS

Polaroll A mobile camera and photo app inspired by the Polaroid Camera. [Github](#), [Demo](#)

- Demonstrates ability to quickly learn new technologies like React Native.
- Integrates device's camera, camera roll, and motion sensors with React Native/Expo.
- Built with custom animations.

Candle A birthday reminder app to never forget a friend's birthday. [Github](#)

- Demonstrates proficiency in React JS, Ruby on Rails, and Sass.
- Integrates Authentication in Rails API backend for secure logins and protected profiles.
- Calculates a user's age on the frontend using the DateTime object and backend data.

Accountabilibuddies A social media app to help accountability groups complete tasks.

[Github](#), [Demo](#)

- Demonstrates proficiency in Javascript with ES6.
- Built with a custom backend route to delete a joiner class and remove a relationship.
- Deploys full CRUD actions on a complex relational database with five models.
